Re: Authorised Distributor of the Full SKF Product and Service Portfolio

To whom it may concern

This letter serves to confirm that **Bolt & Engineering Distributors (Group)**, would be appointed as an Authorised Distributor of the full range of SKF products and services for within the national borders of South Africa.

As a global and leading knowledge engineering company, SKF is relying strongly on its distribution network to offer localised and often personalised customer service, after hours support and where applicable, stock holding. SKF utilize a national network of strategically located authorised distributors with the technical ability to service and supply SKF products who be in the best position to service customer's needs. SKF would therefore recommend that customers channel all their local product and service demands through the relevant distributor branch in their area.

Bolt & Engineering Distributors (Group) has a national footprint consisting of eleven well equipped branches with highly skilled personnel. The company is also direct importers of genuine SKF products and would be directly linked to SKF's logistics system, giving them access to our main warehouses both locally and overseas.

With growing concerns around counterfeiting of high quality products, SKF strongly advocates sourcing SKF products from our authorised channels. SKF would be very proud to endorse our authorised distributors for all your SKF product and service requirements.

We would further want to emphasise that sourcing from any unauthorised supplier would be done at your own risk and that SKF reserves the right not to entertain any warranty, damage or injury claims that might result out of the fitment, operation or use of such product.

To learn more about SKF South Africa (Pty) Ltd, please visit us at www.skf.co.za or feel free to contact Bolt & Engineering Distributors (Group) as your local authorised SKF distributor for more information and assistance with all your SKF needs.

Yours faithfully

Anton Theunissen
